Summary

Third-year Computer Science undergraduate at Uva Wellassa University of Sri Lanka with strong problem-solving skills and hands-on experience in full-stack software development. Proficient in Java, Python, PHP, React, Node.js, and Django. Solid understanding of data structures, algorithms, and object-oriented programming (OOP). Developed scalable web applications focusing on REST API design, database optimization, and user experience. Experienced in Agile development and collaborative team environments. Passionate about building efficient, maintainable, and high-performance software systems. Seeking a Software Developer Internship to apply technical skills and grow professionally.

Education

Uva Wellassa University of Sri Lanka
BSc(Hons) in Computer Science and Technology
Expected Graduation: 06/2026

Sept 2022 – Present

Projects

React-Based E-Commerce Platform

- Tools Used: React, PHP, MySQL
- GitHub: github.com/nihasuba/Project-1.git [🔗](#)
- Developed a comprehensive React-based E-Commerce platform with distinct dashboards for Admin, Company, and Customer users.
- Implemented CRUD operations for companies to add, edit, and delete products, and for customers to place and manage orders. Developed an admin panel with CRUD operations and REST API integration to
- manage company and customer details, products, and orders — improving operational efficiency and data accuracy.
- Integrated customer reviews and ratings for products to enhance user feedback and trust.
- Enabled password recovery functionality with secure OTP verification via email.
- Designed a notification system to alert users about order updates, new messages, and system changes.

Book Review System

- Tools Used: Next.js, Django, Tailwind CSS, PostgreSQL
- GitHub: github.com/nihasuba/book_review_frontend.git [🔗](#)
- Developed a full-stack Book Review System using Next.js, Tailwind CSS, and Django, implementing full CRUD operations for books and reviews, along with a real-time rating and feedback feature.

MERN-Based To-Do List Application

- Tools Used: Express.js, MongoDB, React, Node.js
- GitHub: github.com/nihasuba/ToDo-List [🔗](#)
- Designed and developed a full-stack To-Do List web application using the MERN stack.
- Implemented user authentication with registration, login, and JWT-based session management.
- Integrated secure password recovery via email-based OTP verification for forgotten passwords.

Technologies

Languages: C, Java, Python, PHP, SQL, JavaScript, React.js, Next.js, Express.js, Node.js, Django, MongoDB, PostgreSQL, MySQL, Git, Postman
